

Your Appointment Journey

Step 1. Create your account

Open SmartHealth Register. Enter your name, email, and a password of 8 to 72 characters. The clinic creates a patient profile for you. Then log in. Providers and front desk accounts are not self-serve.

Step 2. Choose a provider and time

Open the provider list and pick a clinician by name. Choose a future date and time. If you are unsure which specialty you need, read the Specialty Guide first or book family medicine.

Step 3. Slot is held (pending)

After you book, status is pending. The clinic is holding that slot. A provider should confirm soon. If the hold expires with no confirm, status becomes canceled. Refresh your appointment list if you are waiting.

Step 4. Confirmation

When the provider or front desk confirms, status becomes confirmed. You should see a notification that the appointment was confirmed. Prepare for the visit using the Test and Procedure Preparation guide if labs or imaging were ordered.

Step 5. Change of plans

Need a new time while the visit is still pending or confirmed? Use reschedule and pick another future slot. If you cannot attend and do not want a new time, ask the clinic to cancel. Do not book a second overlapping slot with the same provider.

Step 6. The visit

Arrive on time with ID. Front desk and the provider complete the visit in SmartHealth. Status becomes complete. You may get a completed notification. Follow-up booking uses the same book flow.

Step 7. After the visit

Read any prep instructions before labs. Book a follow-up with the same or another specialist using the specialty guide. Check notifications for confirmations and cancellations. Questions about symptoms are not a substitute for in-person care when you are acutely unwell.

If something failed

If booking returns that scheduling is unavailable, the hold never started and you should try again. If the hold expired, book a new time. If you are not allowed to change a visit, you are signed in as a patient on an action only staff can take.
